Our Vision

Gigamind is a Christian based kindergarten, dedicated to providing quality education. Our pedagogy aims to stimulate the development of the children's multiple intelligences and develop their potential to the fullest. We are committed to nurturing the children in becoming globally minded future leaders of the millennium.

Our Mission

We are dedicated to nurturing the qualities of being knowledgeable, independent, caring, responsible, virtuous and reflective global leaders.

The convergence of science, art and religion is the source of creativity in the 21st century and is also the driving force for children to take on the challenges brought about by the technological world.

- We emphasize in forging a scientific mind so that the children develop the habit of searching for truth and mastering technology in the future.
- Through artistic creation, we help the children to cultivate their capabilities in both imaginative and creative domains; while injecting a new vitality into the knowledge domain.
- Through Christian and moral education, we strive to promote a positive view of life and to instil in the children the fundamentals necessary to building a peaceful society; gratitude, love and forgiveness.

Curriculum Features:

- 1 Our curriculum is child-based and from the child's perspective. The school's curriculum is geared to meet the children's abilities and interests. It is designed to stimulate the growth of the children and their potential to the fullest extent in a comprehensive and well-balanced manner.
- 2 Our school provides different learning activities to develop the children's learning skills, restructure their experiences, and construct knowledge for building a firm foundation for their future learning.
- 3 To allow the children to learn in a joyful atmosphere as well as an open and advantageous environment; while providing them the opportunity to take the initiative to explore and create with ample time.

Campus Environment

The campus is designed to meet the developmental needs of the children. With a commitment to help develop the children's physique, the school has set up outdoor and indoor gyms for training their gross motor skills. The classrooms are of an open design. Inside are various activity corners that allow the children the opportunity to explore their surroundings and to arouse their inquisitive nature.

Teaching Staff

All our teachers not only have received professional training in early childhood education, they are also experienced and versatile in different skills with a rich knowledge of children's mental and physical development and learning needs.

Programs

Infant & Toddler Learning Programme

This program is intended for children aged 1 to 2 years, accompanied by an adult. Our teachers design and organize integrative games and activities geared for the children's sensory development. This program will stimulate their curiosity and interest, enhance their listening and speaking skills and develop their social skills. Our English teacher designs lessons that will raise their interest in learning English.

Two's program

This program uses Cantonese (mother tongue) as the medium of instruction. The English teacher organizes lessons that promote interactive learning and use of the English language. This program provides abundant opportunities and interesting learning experiments for the children. It allows them to take the initiative to become more self-reliant and independent, while also enhancing their physical development.

Three's to Five's program

These programs are bilingual (Cantonese/English). Both Cantonese and English teachers work collaboratively to expose the children to both languages equally. Putonghua is taught by a native teacher biweekly. These programs are based on the children's development and interest. The children are encouraged to learn by participating in investigative activities. Through these activities, the children are able to acquire different skills. We encourage the children to be independent, initiative, responsible, willing to participate and cooperate with others.

Parental Involvement

Parents are expected to adopt our education philosophy, maintain good communication and close co-operation with the school for the children's benefit. Gigamind keeps in contact with parents through various ways, such as family day, parent interview day, seminars and curriculum introduction and monthly newsletters.

Admission Procedure

Documents for enrolment

Please attach the following documents:

- duplicate of birth certificate
- duplicate of vaccination records
- four recent photos
- three self-addressed stamped envelopes
- Application fee \$30
(Crossed cheque only, made payable to 'Gigamind Education Foundation Limited'.
Please write the applicant's name on the back of the cheque.)

Remarks:

1. The school is a non profit-making kindergarten and has passed the quality review from EDB.
2. A private school bus company has agreed to provide transportation services to our students.
There will be attendants to assist the children during the entire journey to ensure their safety.
